

# EXTENDED REACH TOOL

## DESCO EXTENDED REACH TOOL

The Desco Extended Reach Tool is our most recent 'Innovative Solution' to hit the market. By simply coupling our customers needs with our engineering controls, Desco has once again forged it's niche in the surface preparation industry. Our ergonomic design keeps the head of the tool where it needs to be with ease and control. The adjustable handle allows for ambidextrous use while the pneumatic actuation lever gives the user control over the air generated power.

### Features

- Adding 5 feet of reach gives the average man the ability to access overhead up to 12 feet without the need for a ladder.
- Ergonomically designed for extended use and operator safety.
- Adjustable handle for different heights.
- Air actuation lever located at bottom of pole.
- Offered with a 2" or 3" fixed-head dust collector system.
- Convenient 'Roloc' back-up pad system uses coated abrasives as well as non-woven discs.

**3" Fixed-Head Die Grinder**  
with extended reach handle  
180.2193

"The 5 foot extended reach provides access to hard to get areas underneath objects and below deck plates."

**2" Fixed-Head Die Grinder**  
with extended reach handle  
180.2192

### Specifications

- Weight.....5 lbs.
